Comment on Fat Score 1 Cattle	All score 1 cattle presented are fit to travel long distances.
Vendor Bred	Yes
Stock History	Bred from very good quality Angus cows purchased as heifers and cows from the New England area of NSW a few years ago. At the time they were assessed as 100% Angus X Angus.
Lifetime Traceable	100% of cattle in this lot are Lifetime Traceable
Breeding Comments	By an AI son of a Texas Angus bull, Glenisa Angus, a son of an Alumy Creek Angus bull. Also AI sons of US bulls Musgrave Exclusive & Sydgen Enhance.
Grazing Conditions	Running on a very dry coverage of native summer grasses that has seen limited summer rains so far. The past 2 weeks they have run on improved pastures of Rhodes grass and Premier Digit. Returned same
Burr/Seed in Coat	Noted the odd Noogoora burr in coat.
HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives

Health Treatments	Drenched	10/12/2025	Cattleguard (weaning)
Chemical Residue	Clear - No known history		

Vendor Comments	These heifers are normally retained for future breeding requirements but due to the dry season they are a regretful sale. These cattle have had no grain or antibiotic at any stage of their life and happy to sign a declaration.
Joining Details	Not Station Mated
Other Joining Details	To the best of the vendors knowledge these heifers have had no exposure to any bulls at any stage.
Any Access To Bulls or Stags?	To vendor's best knowledge, this lot has had no access to bulls or stags.

Temperament

Yards	Crush	Paddock
Quiet: 62 head	Quiet: 58 head Slightly Stirry: 4 head	Temperament not assessed in Paddock

Heifers were very quiet in all areas of the yards. Approximately 4 head did resent being in the crush but they settled down very quickly once they exited the crush and were back with the main mob.

Handled With: Bikes

Notable Traits

	Traits
4 Head	Light warts on head
1 Head	Ring worm scars
3 Head	Warts on neck

Assessor Comments	Buyers, these are a regretful sale due to the dry seasonal conditions that would normally be retained to continue a breeding program. These are good quality Angus heifers bred from females purchased out of the New England area that present in mainly store condition. The heifers are very quiet; the vendor's always do an excellent job throughout the weaning process and this is reflected. Heifers bred on lighter country, and I will suggest they will fly ahead if they get access to better feed conditions especially on heavier country. There has been plenty of rain north of the border regions that have completely missed out and would be an opportunity to fill paddocks. All the hard work is done; well and truly over the weaning process. Ideal to put away and background to heavier weights & meet all domestic feeder specs later in the year. Wongavale cattle are continually attracting repeat buyers, evidence they must perform. There are 37 steers available from the same property to fill decks.
Assessor	**Bob Jakins (Level 1 Accredited)** Phone: 0419 788 366
Delivery Period	23/03/2026 to 25/03/2026 (3 days)
