Assessor Comments	A cracking line of well bred Angus X Angus Heifer weaners on offer that wont disappoint, a great chance to beat the rush and secure your weaners now. These Heifer weaners present in great forward condition and were bred out of large frame cows that consist of Glenavon, Bald Blair and Eastern Plains angus genetics. Heifers are usually weaned off the cow and kept for replacements or carried through to heavier weights but given the continuing dry conditions in the area and lack of feed a decision has been made to sell the lead draft of heifer calves to ease the numbers. Off the back of great New England Angus genetics these heifer calves will make great replacements or suit all Angus feeder or finishing markets going forward. Ideal low dollar Articles to put away for when the rye grass and oat crops come up.
