Assessor Comments	A terrific draft of vendor bred, Grass-Fed, Antibiotic Free and very well weaned steers. These steers have gained at 0.57 kg a day since weaning on irrigated forage that has now ran out of water to irrigate so has hayed off. These steers are never usually offered at this age as they are generally carried out to heavy feeder weights. This is a great opportunity to purchase a large run of quality steers that have had been bred to perform. Please note there were 5 - 6 steers treated at assessment for active or old eyes. These will be re assessed at delivery.
