Vendor Bred: No
Vendor has owned stock for 6-12 months

Stock History: Almost all vendor bred out of mainly a herd of red cows with Simmental, Charolais, Santa, Brangus & Angus & their crosses in their makeup. All steers are by mainly Ultrablack & a few Angus Composite bulls. 23 steers in lot not vendor bred.

Lifetime Traceable: 100% of cattle in this lot are Lifetime Traceable

Bloodlines: Ultrablack bulls have been purchased for the past 4 years ex: Palgrove at their annual sale. Angus Composite bulls ex: Bingara area (NSW).

Grazing Conditions: Developed red Box/Pine type country that still has a body of dry Buffel and dry native grasses. Are being supplementary fed with Ridley weaner pellets in self feeders in the paddock and have been since August.

Returned to: Steers will return to a similar paddock closer to yards. Weaner pellets will still be supplied.

Burr/Seed in Coat: No Burr or Seed of weeds declared noxious observed in the coats at assessment

HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives

	Vaccinated	13/01/2025	5 in 1 (branding)	First Dose
	Vaccinated	13/07/2025	5 in 1 (weaning)	Second Dose
Chemical Residue	Clear - No known history.			

Temperament	Yards	Crush	Paddock
	Quiet: 70 head Slightly Stirry: 3 head	Quiet: 69 head Slightly Stirry: 4 head	Temperament not assessed in Paddock

Steers were excellent to handle in all areas of the yards. They displayed a calm disposition out in the bigger yard while being photographed and evident in the video. There were the usual small percentage that did resent being in the crush but settled very quickly once let out and back into the mob. Buyer is urged to allow these time to settle on arrival before showing them the gate.

Handled With: Bikes , Dogs

Assessor Comments: Buyers, here is an attractive lot of steers for your competition. These have presented very well considering the dry seasonal conditions and most are doing well on the supplementary pellets. All things considered they do show fantastic growth and weight for age with most of these demonstrating good muscle development, depth of barrel and bone. You can really see the genetic gain of the Palgrove bulls kicking into this herd. The weighing indicator did show a range of weight gain, some putting on plenty & some marking time but averaged right through .95kg/day for 89 days. These will suit all feedlot markets, both export and domestic. They are accustomed to putting their head in a bin so they should adapt quickly in a feedlot scenario. All steers look to be very healthy, clear in the eyes and clean noses. These were mustered and walked 7kms to the yards to be assessed. Very quiet steers to handle in all areas of the yards.
