Assessor Comments

Buyers here is an excellent opportunity to purchase a light 3 decks of PTIC Angus x Angus heifers. All the hard work is done. These heifers were all purchased based on their bloodlines and quality. The vendor has hand selected Rennylea bulls for their low birth weight, short gestation and calving ease daughters. Additionally, the sires used are high IMF, great carcass traits and fat positive while being rounded off with great temperaments. These heifers were preg tested in calf, they have been drafted into their gestation window and are currently 12 - 16 weeks in calf. We are able to supply a Vet certificate on request. These heifers weighed 379 - 562kg to average 452 FULL at assessment. Please note in the there is one heifer that is Angus x Angus Cross, 4 heifers with white between udder and navel and 5 heifers with some old pink eye scarring. PLEASE NOTE TRUCKING DATE *** PLEASE NOTE SAME VENDOR HAS ANOTHER PTIC LOT IN THIS SALE THAT ARE 6 - 12 WKS IN CALF FROM THE SAME MOB ***
