Assessor Comments	Excellent line of EU Accredited 2.5 year old Angus hfrs, scanned in calf to Angus bulls to commence calving early March for 8 weeks. The "Glen Collin" females enjoy a great reputation for their "doing" ability and capacity to put calves on the ground. Ultimately these cattle are bred for their performance in feedlots or EU / MSA slaughter markets. Vendor is only selling them as they do not have any Autumn calving females in the herd. These females are joined to vendor bred Angus bulls which are bred from the Glen Collin elite herd. Industry leading sires are selected to be used in the GC elite herd with breed average birth weights and calving ease, top growth, carcass and maternal EBVs. Genetics used include Glen Avon, Ben Nevis, Baldrige Beastmode, Gar Ashland, SS Niagara & Montana Elevation. Note: odd cloudy eye not detrimental.
