Assessor Comments	Dispersal of the well known "Braemar" Angus and Composite EU accredited herd due to impending property sale. Four lots in this sale, all are from 3 to 6 years old, most 3 to 5. The cows were a pleasure to handle, they are mostly big framed and roomy cows. The management for many years has been to produce docile fertile females which produce a calf every year. Every effort has been made to remove any cows with identifiable commercial defects. Note that Pestiguard vaccination in June 2025 was only administrated to the 12 three and four year old cows, though all were previously vaccinated with Pestiguard in June 2024
