Comment on Fat Score 1 Cattle

1 heifer presented a little drier in the coat than the rest, but was lively and strong whilst working through the yards, with no visible mannerisms that distinguished her from the rest of the mob in terms of healthiness.

Vendor Bred

No

Vendor has owned stock for 6-12 months

Stock History

Purchased ex AuctionsPlus, as a larger line of PTIC heifers, out of Dunedoo NSW. Calved down by the vendor & mothered into smaller lots. All heifers have calved unassisted, to an even drop of fresh calves gaining good weight.

Lifetime Traceable

Unknown

Bloodlines

Heifers purchased in several lines as weaners by the previous owner, with mixed Angus & Angus cross bloodlines.

Grazing Conditions

Dried-off, short improved & native grass pastures, with supplement of CALMAG & Salt lick

| Assessor Comments                     | A good line of quiet Angus & Angus cross heifers, on their first calf. These heifers were purchased as part of a larger lot of PTIC 1st calvers out of Dunedoo, ex AuctionsPlus, before being calved down & mothered into smaller lines. Heifers present as medium to good frame & are nourishing an attractive line of marked & vaccinated EASTERN PLAINS ANGUS sired calves at foot, which have attained weanable weights. Presenting in fresh store condition, having put most of their energy into sustaining the heavy calves at foot, these heifers are starting to clean up in the coat, but need to be moved on as feed diminishes. Approx 4 cows were observed to have a small percentage of cross in the breeding, with 1 heifer showing traits of slight Santa influence, & some Hereford/red-coated cross influence in the other 3, with minor white on underline. Great opportunity to replace old breeders with young breeders at very favourable changeover rates, whilst getting a bonus calf & change in your pocket. |            |                                           |                |
