Notable Traits	Traits				
	3 Head Minor eye blemish				
	7 Head White splash on udder				
Assessor Comments	An excellent opportunity to secure some of the country's best Angus genetics. Bred by one of the leading cow herds in the Upper Murray, these Tintaldra station females were bred with a heavy use of AI with a major focus on growth & carcass traits, and a portion of these heifers also include use of the genomic "Heifer Select" program with Angus Australia. Predominantly second calvers, these medium to large framed females have all their lives ahead of them and are doing an excellent job on their Oct/Nov Dunoon sired calves. Outstanding temperament, these young females will give a big genetic jump to any herd.
