| Vendor Comments        | These heifers were either bred or purchased as weaners. We grew them on and bred them. This is their first calf and they are going a very good job on them. They are excellent to handle. Only selling off due to reducing breeder numbers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                               |                                          |                                     |

| Assessor Comments      | Here are a very good line of Limousin and Droughtmaster cross heifers with Limousin cross calves at foot. Calves are by Ulster Stud Limousin Bull. These heifers are on their first calf so have all their breeding life in front of them . These heifers are very good to handle. The heifers are doing a very good job on calves . All but 1 calf have been marked so most of the work has been done on these units. Heifers have been running back with same Limousin bull for 56 days so a good chance they could be back in calf. These heifers in the past have been 3 germ blooded for ticks. If you are looking for some young quiet breeders on their first calf then look no further than these. Please note this vendor has another lot of cows and calves in this sale. |                               |                                          |                                     |
