Assessor Comments	A very good quality line of well grown, Angus 1st calf heifers with excellent quality TeMania Angus sired calves at foot. These heifers are well developed, exhibiting good frame & plenty of stretch. They are producing an excellent supply of milk, which is evidenced by the high growth rates & sappy condition of the marked & vaccinated calves at foot, which are 6-14 weeks of age, exhibiting excellent shape with softness, & muscled-up beautifully. These heifers are very well bred, & are very even in type between the vendor bred TeMania heifers & the purchased Millah Murrah heifers. The calves are tagged with either red or yellow management tags which denotes the bloodline of their mothers. A great opportunity to secure a top quality line of Angus cross breeders with many years of production ahead of them, & some absolutely cracking Angus calves at foot. With prime old cows currently selling well, they offer real value & an attractive change-over opportunity into younger breeders.
