Assessor Comments: An opportunity to purchase a good line of PTIC Angus x Angus Heifers. All heifers were preg-tested on the day of assessment (3 - 6 Months in calf). They were joined over a 89-day period. In calf to well-bred Angus bulls: the bulls used over the heifers are out of full-blood Clunie Range cows sired by Clunie RADFORD. These Angus heifers show good weight & frame size for age and should produce a quality calf. Heifers presented in forward condition. At time of assessment, heifers flowed exceptionally well through the yards, making them a quiet, well-educated line to have around. NOTE: 2 heifers had mild blue-eye scarring. VENDOR HAS MULTIPLE LOTS IN SALE.
