Assessor Comments	A quality line of predominantly Angus X Angus Santa PTIC heifers. Heifers were bought as weaners, grown-out and later joined to quality, full Clunie Range blood bulls. The bulls used over the heifers are out of full-blood Clunie Range cows and are sired by Clunie RADFORD Heifers have good weight for age & frame about them. Heifers presented in forward condition at time of assessment. Preg-test was completed at assessment, with all heifers joined between 01/10/25 - 28/12/25. The 89-day joining period does make them a desirable line of heifers that should produce a quality calf. Heifers flowed well through the yards, they should be a quiet, well-educated mob to have around. NOTE: 1 heifer had scarring under eye that does not seem to impact her. 2 heifers had mild blue eye scarring. VENDOR HAS MULTIPLE LOTS IN THIS SALE.
