Assessor Comments	Buyers, here we present 21 good quality Angus PTIC heifers averaging 412kg at assessment with a 4-hour curfew. These heifers are in forward store condition, have been grazing improved pastures and are doing extremely well. They show good bone, depth and femininity, developing into the type of future breeders suited to a range of operations. Heifers are preg tested in calf 8 to 16 weeks (1.8 to 3.7 months) to a good locally bred registered bull, due to calve mid-August through to mid-October 2026. Health treatments are up to date. A genuine, even line ideal for a self replacing herd or to calve down and market as quality young cows with calves at foot
