	Cows have been well worked on bikes and on foot, cows were good to work in and around cattle yards. One cow become slightly agitated and kept coming back to its calf in another yard. Once cows and calves were back together they all settled down and walked out of the yard quietly.

Assessor Comments	A quality line of 6 Angus cows presented in good store condition, showing excellent maternal strength and overall doing ability. Each cow has a strong, healthy calf at foot that is well grown, even and displaying excellent vigour. These proven breeders are PTIC back to an Angus bull, 6–8 weeks in calf, offering a genuine three-in-one opportunity. A great chance to secure a small, manageable lot with the potential for a quick rebate through the sale of the calves into the upcoming weaner markets, while retaining the future production of the cows. There is plenty of upside in these cows, as they are currently putting it all into their calves. All they need is some a stand of feed in front of them to go forward. An efficient, productive package that represents real value and flexibility for any operation.
