Assessor Comments	Buyers, on offer is a high-quality line of 15 PTIC Purebred Angus heifers sired by top quality AI and NBGen bulls. The group were AI'd and backed up to registered Angus sires and will suit a spring calving program looking to boost numbers or start a line with a strong base. The NBGen program focuses on multi-trait excellence, including calving ease, rapid growth, carcass quality, strong maternal form and function. Although being offered as commercial Pure bred, all heifers have been sire verified, tested free of Pesti virus, and have genomics results recorded at the laboratory. These heifers were originally selected and joined as replacement females; however, a recent stud purchase has resulted in an overstocked position, forcing the sale of current stock. Confidence in the quality of these heifers is very strong, making the decision to sell them a difficult one. A great opportunity not to be missed.
