Assessor Comments: A rare but great opportunity to secure a line of very well bred EU Angus PTIC heifers that come from a breeding program of over 40 years in the business. The Raftety family pride them selves in breeding Quality cattle that consistently meet the needs of feedlots and processors. Heifers are bred from a large framed quality cow herd of Quality New England Genetics including Wattle Top, Glenavon, Eastern Plains & Glen Morgan angus. Seasonal conditions coming into winter see's a regrettable sale of these future breeders, heifers are at good avg weight of 460 kg full and will continue to grow into large frame females consistent with Javor herd, Heifers had great conception rates showing great fertility. The valve is in the genetics of these heifers, last year the Javor steer weaners toped the A + market for that week making 485 cents at 319 kg. Calving from mid July onwards for 8 weeks to LBW quality angus bulls, Front paddock females not to be missed.
