Assessor Comments	Thes Heifers were drafted on weight the maximum being 370K minimum 300K, with feed lotting in mind, I mouth 10 of the heaviest all had milk teeth. The Heifers handled well, My opinion is that a number of the heifers are from angus bos indicus cross history. All heifers are black. They have not been depastured with bulls but to ensure they were empty, They were injected with Bioestrovet to terminate any chance of pregnancy. They are right and ready to perform.
