Assessor Comments	51 EU PTIC Heifers to commence calving from 25/08/26 to 15/10/26. These heifers tick every box in my opinion. Joined to Te Mania U366 with a low birth weight of +2.5. Very well grown roomey heifers that treated right should provide calving ease to any successful purchaser. With the Skeer family using Te mania bloodlines for over 20 years, these heifers have a long line of proven history behind them and will go on to be great mothers. They are outstanding young females with depth, structure and temperament to develop into high performing , heavy type breeders. Present a fantastic opportunity to secure an impeccably bred line of PTIC heifers in a very buoyant time in the cattle market.
