Assessor Comments	RAW family trust presents the april claving heifers of their PTIC program. These 18 selected Baldie heifers are in pre-calving condition with plenty of fitness grazing the Ballaparuda hills. Many broken faces suggest heifers are bred as Angus over baldie cows. Joined to AI sire Allendale True Blue T325 for an 18th of April calf enjoy the benefits of low bw, high growth with a tight calving. Heifers bought true to type, developed right, AI mated, well handled and educated, there's nothing left to do but calve down. Please note that heifers are close to calving when considering transit distances Vendors are offering another 26 Angus heifers in the sale and freight to successful purchasers by prior negotiation.
