Assessor Comments	Vendor has presented a quality line of White Dorper ewe Lambs, (as dropped) showing good growth for age, frame and bone. 550 head, a run out the gate of 1100. Weighed 200 head, 3 hours off feed, 25 to 62 kg to avg 38.3 kgs. Originally running on Balonne River flood plain country, natural pasture & herbages etc, returned to hay in the yards. Had Glanvac 6 vaccination at lamb marking. An obvious tail has been removed. Ewe lambs have been running with their mothers that been depastured to White Dorper Flock rams Nov 10th 25 to 10th Jan 26. NB: Buyers taking lambs long distances, please allow for extra liveweight shrinkage if any. I noticed a few lambs, maybe a dozen in the 1100 head were showing some scabby mouth. Three head are mostly black, a white dorper genetic throw back? Please advise if delivery period does not suit. Extra 550 ewe lambs in this sale.
