Other Joining Details	Rams stayed in right up to scanning so twins couldn't be detected. End of joining dates were compiled using the scanners ability to identify pregnancy		
Assessor Comments	A great opportunity to secure these stylish 1st X ewes scanned in lamb to selected 'Ferndale' Poll Dorset rams to commence lambing very early April. These ewes have reared excellent percentages of lambs in previous years and are only being offered due to a loss of the lease block. They were scanned too late to pick up multiple bearing ewes, but it would be assumed there would be a healthy amount of multiples in this lot. The majority of these ewes were purchased last September and the oldest line were all mouthed sound then prior to joining.
