These form part of the Cooranga Flock dispersal and have been scanned up at 102% to the 'Hillside' Poll Dorset Rams. Twins have not been identified. Rams were introduced on the 29.11.25 and taken out on the 10.1.26. These ewes present in light store condition and have had a tail removed. They are Mulsed, drenched and Jetted off shears. Please note there are some long toed sheep but are not considered detrimental. Vendor placed a lot of emphasis on wool production and last years adult flock averaged 18.6 micron.
