These Heifers have a tendency to run when first put in the yards. A few did not settle and were a bit stirry first up, more trying to get away from you. After assessing they settled once back with the mob. To be fair we ran them in and started the assessing process straight away. They are Heifers that are easier to handle if left to settle first. The odd one played up in the crush, nothing unusual there. Overall Heifers that are easy handled by experienced operators.

Assessor Comments

A tidy line of 52 Millah Murrah blood Heifers that are going forward and are the ideal weight to join or alternatively finish on grain or grass. They are Heifers that will make for front paddock cows. As you can see by the videos they have the frame, conformation and muscle pattern you would expect from the Millah Murrah blood lines. The breeder has selected bulls on type not price and this shows through. A few have a skin reaction around the eyes from the hay feeders. There is another lot of Steers from this breeder also in this sale as well as another local district line of heifers. Inspections prior to sale welcome.
