	Wrinkle Score		
	Plain	100%	
Assessor Comments	These lambs have done extremely well since weaning as they were put on a failed sorghum crop and their body condition indicates this. They are a fairly even line and the smaller lambs will be removed before delivery. The client is only offloading the lambs because of increasing dry conditions. They would be a god opportunity for someone to value add as they average 41.1kg (live weight) and would finish well on grain or a crop. I did not come across any 1 body score condition lambs in this mob.
