Vendor Comments	Lambs fed in two lots; 80% of line fed for longer period of 10 weeks, currently consuming 1.5 - 2 kg per day. The other 20% been on pellets for 10 days & will be kept separate until delivery. Paddock feed now good after good rain 5 weeks ago.
Any Access To Rams or Stags?	To vendor's best knowledge, the female portion of this lot has had no access to rams or stags.

Quality Grades		Wrinkle Score	
Very Good	25%	Plain	100%
Good	65%		
Fair	10%		

Assessor Comments	Good quality Dorper & Dorper Cross lambs in very fresh forward condition with the top end suiting the lighter end of slaughter specifications. Note almost all of the store 1's are at the top end of that range. 100% weighed minimum 30 kg, to a top of 45 kg, as weighed 4 hours off feed and already started on grain pellets, these lambs would suit to take up to heavier weights in feedlot or pasture. All were mouthed as lambs the day prior to assessment by the vendor. The larger line (80% of the lambs) were treated with 5 in 1 at marking (10/11/25) and again on the 15/2/26 & 01/05/26, the other 20% were first vaccinated on 28/12/25 and received their second vaccination on 20/4/26. The larger line were also drenched Coopers Trifecta on 1/5/26 (28 day ESI), and the smaller line were drenched with HRC Exacta on 16/06 (10 day ESI). No ESI remaining on lambs. Andrew Wilkie also Parallel Assessing this listing.
