| Assessor Comments            | A tidy line of 165 x Aug/ Sep 2025 Drop Primeline Ewe Lambs. An excellent opportunity for buyers to background for a future breeding program or fatten for a late winter/ early spring lamb kill. Healthy ewe lambs that were joined as a complete drop. These ewe lambs are identified as empty but given their body weight it would be unfair to class them out on fertility. A 15% tail was removed at assessment. The ewe lambs are in mostly store to forward store condition and will respond favourably to quality feed. All lambs weighed above 30kg curfewed after being locked up overnight for crutching. Given the strength of lamb and restocker markets there is a lot of upside in this young ewe lambs. Ewe lambs are trained to grain and will eat at lick feeders. |            |                                         |
