Assessor Comments	Well bred line of shorn feeder lambs, that are trained to grain though have not recently had exposure due to being on grazing wheat crop. Individually weighed into a very tight weight group of 38-43kg at assessment with the lead and small % of tail retained on farm. Lambs are performing well on grazing crop and would be generally taken through to august as export lambs. Lambs are proven performers from a well-managed large operation. Please note: lambs were assessed after large amount of rain and will dry out well. Please call Cameron or myself for further information.
