Notable Traits	Traits	1 Head Missing one ear - lamb in perfect health.	
Assessor Comments	A very good group of 165 x August/ September 2025 Drop Feeder Lambs. Lambs all weighed over 35kg full. The lambs present in excellent condition, are very well shorn and are in forward to fat condition. A great opportunity for buyers to purchase lambs that know how to eat grain out of feeders (not currently on grain) and lambs that present with a tidy skin that won't need shearing again. The lambs are currently grazing on oats and will transition onto crops for finishing. The lambs are by Lambpro Primeline and Tradie sires out of Primeline ewes. Note: the lambs are stated as August/ September drop, the vendor has two joining's, and the odd lamb could be from the early July drop. Please take note of photos of a sample of mouths photographed. Majority of lambs are tight and are a long way from cutting, the odd lamb is starting to spread.
