Assessor Comments	A very even line of young ewes that have been scanned empty and would be able to do a spring joining very quickly on some good feed. This mob of ewes would be ideal for joining to cross breeds or back to Merinos. They are not culls, the only reason client is selling is they were scanned empty. They would very quickly, on some better feed get into a good joining condition as all ewes have previously had a lamb except the black tags so they are not dry sheep. They only scanned empty due to the dry conditions at joining. Vendor also have 369 ewe lambs in today's lamb auction.
