Pregnancy Terms	AuctionsPlus Standard Terms apply.			
Assessor Comments	ON OFFER are 142 SIL July/August Drop 2025 Dohne ewe lambs. These young future breeders averaged 56.7kg liveweight at assessment and carrying 65mm of wool length. These ewe lambs have been joined to Flex White Suffolk rams and were pregnancy scanned by Nick Williams on 26/06/2026, identifying 98 single-bearing ewes and 44 multiple-bearing ewes. Twin-bearing ewes have been identified with a blue dot on the rump for ease of management. The Master family is well known throughout the Wellington district for breeding true-to-type, high-quality Dohne. These future breeders present an excellent opportunity to secure proven productive young future breeders. These ewes are set for a September–October lambing, maximising lamb growth through the spring months ahead. These ewes carry my strongest recommendation.			
Assessor	Thomas Pollard (Level 1 Accredited)
