Shearing Info

Shorn 15 Nov 2025 Not Crutched

Wool Length

40% 1.5 - 2" 60% 2 - 2.5"

Majority Length

55 Millimetres

Degree Burr

Very Light Type: Clover & Bathurst

Degree Seed

Very Light Type: Barley grass

Shedding Breed Contact

No known contact with shedding breeds

Skin Comment

Typical for breeding being principally coarse. Some Bathurst burr on property, did not note any on ewes but possibility there could be small amount of remnant burr.

Wool Comment

Wool typical for breeding being from downs type to broader & coarser.

Vendor Bred

Yes

| Assessor Comments                          | A neatly presented draft of SIL Cashmore Oaklea ewes. Ewes have been scanned 100% (wet/dry) to lamb late August for 6 weeks to the Cashmore Oaklea maternal ram. They've had a pre lamb drench & vaccination, are in very good condition and are surplus to requirements being the later lambers at scanning. Mixed age profile, being principally younger but small sample of older ewes were mouthed and were sound. Daggy ewes to be crutched prior to delivery. Bred from a very productive flock, ideal little lot for a top up or lifestyle farmer. |
