Comment on Fat Score 1 Sheep

Strong healthy 1 scores. Ewes have been held on shorter green pick until recently to allow pastures and crop to come away. Ewes are on the move forward and have plenty of energy.

Assessor Comments	Highly sort after Cashmore Maternal Composite genetics scanned in lamb. This line of ewes all produced lambs in spring 2025. The lambs off these ewes that were sired by the same Winton Park SheepMaster rams had exceptional growth rates & yield. Notably the last load of lambs sold to Fletchers International in June (71kg av) averaged over 50% yield from live weight to carcass weight. Also notably using EID scanning at weigh dates a vast majority of lambs produced from these same ewes showed weight gains of 400-600grams/day consistently. Also available in same sale are 2 lines of SheepMaster sired ewe lambs & hogget/ 4T from the same Cashmore & Cashmore Nudie composite ewe lines.
