Assessor Comments	Presenting a line of 110 BL/MO ewe lambs, last week 3 out of 4 lots of 110 head sold run out the gate. The remaining 110 head are by no means the tail but a true representation of the mob. The buyer of the balance of the mob is extremely happy with the quality of the sheep. Young females with the making of front-paddock-style ewes, plenty of frame, length of body, while carrying adequate condition going into lambing. Ewes were scanned as a complete drop with less than 10% not joining and were removed. At scanning they were scanned pregnant and empty with the scanner noticing "plenty of multiples in the mob" SIL to Valley Vista Poll Dorset blood rams. Buyers please note that the ewes were assessed as a mob not individual lots as per weights. Light Bathurst Burr was noted at assessment on points, poll and jowl, see photos attached. Of the ewes assessed 10 head were noted with light stain around the tail.
