Assessor Comments	Offering a line of 500, Classed In, Station Mated, Rising 3yo, Dorper ewes with top end genetics. The Crozier Family has been selecting rams from Burrawang for the past 16 years focusing on structure, bone, early maturity and muscle to produce an easy care, productive ewe. These ewes are very true to type having great conformation and bone. It is evident the investment the Crozier family has made into their breeding program with ewes still presenting in great condition in a very dry season. Ewes present in forward condition averaging 62kg at assessment and have been running with Type 4/5 Burrawang rams for the past 8 weeks giving them every chance to be in lamb. This is a regretful sale as these ewes are normally retained in the Crozier breeding program but due to seasonal conditions are on the market. These young ewes would ideally suit anyone looking to go into shedding sheep or add to an existing flock and would be a great asset for years to come. Odd ewe has tail. If you have any further questions please don't hesitate to call
