| Assessor Comments                     | Buyers, presenting a quality line of 4 to 6 year old June-shorn Merino ewes, scanned in lamb to Border Leicester rams. These productive ewes are carrying a genuine 16.6-micron fleece and offer an excellent opportunity to breed highly sought-after first-cross ewe lambs, while retaining the ability to produce quality Merino progeny. With spring lambing ahead, they are ideally suited to both prime lamb and replacement ewe enterprises. A well-bred, fertile line that will add value to any operation. Please note these ewes received in excess of 120mm of rain whilst bare shorn in the period leading up to assessment. As a result, they do not present as well as they normally would on assessment day. Given time to dry out and settle, we would expect these ewes to present well by delivery and to reflect the quality and breeding in them. |            |                      |         |                |  |           |     |      |     |      |     |
