Other Joining Details	58 SINGLE BARING EWES. 59 TWIN BARING EWES.
Assessor Comments	ON OFFER ARE 117 SCANNED-IN-LAMB PRIMELINE EWES. These are 2024-drop and are proven breeders, having successfully joined as a ewe lamb and reared a lamb last year. These ewes have been pregnancy scanned, identifying 58 single-bearing ewes and 59 twin-bearing ewes in this offering. Twin-bearing ewes have been identified for ease of lambing management. These ewes have an average liveweight of 62kg at assessment. The ewes were joined to Roseville Park Charollais rams for 52 days and were pregnancy scanned by Andrew Shearman. These ewes are ideal fat lamb producers and present as quality Primeline breeders, SIL to the Charollais rams. These ewes were originally purchased direct from Waterloo Station, the Gill family, who are synonymous for breeding quality Primeline ewes in the district. These SIL ewes carry my strongest recommendation.
