	Steers were fine to walk through in the yards and take photos. When working through the yards they were a bit quick but could be blocked. There were many that pushed up the race and were uncomfortable in the crush but settled quickly. At the time of the assessment these weaners were on their first trip up the crush and once weaned should settle down.

Assessor Comments	Offering 81 weaner steers. These steers averaged 307kg live at assessment and are currently being weaned in the yards until delivery. This line of steers are out of trade cows and were purchased in as cows and calves in 2025. The steers are in good order on the back of a terrific season and would suit to put away and grow out to feeder weights. Please note there was 1 steer sighted with old blight scarring. Also note there are another 107 heifers from the same vendor in the sale today.
