The owner declares that the cattle have not been treated with HGP at any period of their lives

Health Treatments

Drenched05/04/2026Cydectin Injectable

Vaccinated05/04/20265 In 1Booster

Vendor Comments

Steers have weaned considerably very well considering the very dry conditions. Given some fresh feed you wont know these steers in 6 weeks. Normally taken through to feeders, a regrettable sale.

Temperament

YardsCrushPaddock

	Slightly Stirry: 1 head	Slightly Stirry: 4 head	Paddock
	Steers were quite and easy to handle in and around the yards.		
Handled With	Bikes		
Notable Traits	Traits 5 Head Old pink eye scarring in one eye		
Assessor Comments	A Very good run of 114 Quality Vendor Bred Angus x Angus Weaned steers to come off the renowned hills of the Walcha district. Steers are bred from a breeding program of 25 years that are a base of New England genetics including Wattle Top, Glenavon and Bridge water Angus. Steers present in perfect backgrounding condition and are primed for some green grass as they offer good compensatory weight gains as they are all frame. Steers show plenty of stretch and bone with capacity and thickness to match to handle a short or long fed program in the future. This is the lead draft that have been selected, all steers weighed in tight weight bracket from 270 to 345 kg to avg 293 kg full at assessment, please note that steers were assessed in very dusty conditions. A great opportunity to secure B-Double of quality weaned angus steers to suit all markets, Grass fed and Anti Biotic free.
