Assessor Comments	Good quality Angus and Angus cross steers that have presented in mainly store condition. These have been weaned about 3 weeks however I would think most have been fending for themselves longer than that. It is extremely dry here and reluctantly these have to go. I feel these would perform reasonably quickly given access to improved feed conditions. Steers suitable to take through to export feeder weights. Buyers note these were top and tailed on weight and there are also two lots of heifers from this property that can be used to top up a load, all up 139 head.
