Assessor Comments	Fair quality Angus and Angus cross heifers that have presented in mainly store to backward store condition. These have been weaned about 3 weeks however I would think most have been fending for themselves longer than that. It is extremely dry here and reluctantly these have to go. I feel some of these will need some very good quality feed conditions and further animal health inputs (maybe vitamin B12 and AD&E) or something to pick them up as they really are showing the effects of the dry season and lack any condition and growth. There would be about 4-5 that look to have had a battle. Buyers note these were top and tailed on weight and these are the lighter draft. There are also two lots of steers from this property that can be used to top up a load, all up 139 head. See video for a clear indication on this line.
