	These steers were good to handle through yards and into race and crush, with well-handled low stress practises. Please see video for reference.		
Handled With	Bikes , On foot , Vehicles		
Assessor Comments	Good line of Angus Hazeldean and Alloura blood feeder steers, within the right weight categories. These Steers are normally retained in vendor fattening program, that are usually taken out to 600kg for slaughter at approx. 18 months of age, though this year are being sold due to dry seasonal conditions heading into winter and vendor reverting back to Spring drop calves. These steers are always handled with low stress practices, and vendor processes all cattle on his own most of the time, during the weaning process over 10 days steers were moved through yards and fed ryegrass and oaten silage and returned to paddock. Please note: Vendor has one other lot in sale.
