Steers worked well through home yards during assessment. % of steers became unsettled under pressure while being drafted but most could be blocked with no dramas. % of steers were unsettled in race when pressure was applied and in crush while being weighed but resettled quickly once released back into mob. Please note; They tended to trot as mob in big yard away from people. If steers were in a foreign environment and being handled differently, they could become more unsettled.

Assessor Comments	55 good quality EU accredited Angus x Angus weaned steers presenting in healthy store condition that have an estimated average delivery weight of 290.9kg. A line of well bred steers showing plenty of bone and type that would be ideal to feed for the domestic market or the export EU market. Please note; Temperament comments. 4 steers have been treated for pink eye in 1 eye and will be retreated at delivery if needed but will NOT be pulled out unless infection is still bad. Same vendor has 2 other lots in this sale.
