Notable Traits	Traits 2 Head Small White markings on sheath.
Assessor Comments	A Good quality line of well bred EU Angus X Angus Steer weaners on offer, bred out of large frame cows that consist of Glenavon and Booroomooka blood. Steers are usually kept to heavier weights for backgrounding to go into an EU Angus Premium feeder market but given the continuing dry conditions of the area and lack of feed a decision has been forced to sell. Steers have been weaned for over 6 weeks, weaners were quite and very easy to handle and are well handled to dogs. Steer present in good condition and are primed to bounce away shown the right feed. Off the back of quality genetics these weaners will suit all Angus backgrounding, feeder or grass finishing markets going forward. ! A large run of EU Angus weaners not to be missed, 193 steers selling over two lots.
