	Generally very good to handle in and through the yards. Ten steers were moderately agitated in the crush. They simply would not fully settle and exited quickly. All settled quickly when back in the mob and were good to move and manage when taking photos and videos. In paddocks they are educated to single wire electric fences.

Assessor Comments	A good to very good quality line of vendor bred EU accredited weaned steers. With medium to large frame they suit to background to export feeder weights and then crop of feedlot finish for a range of high quality markets. These steers have been fully vaccinated with two Bovilus MH + IBR shots and could be taken directly onto feed if required. Please note that the steers were assessed at two separate properties on the same day with the lighter Angus steers moved to Gossanbar while the heavier steers are at Angle Camp. They are by very good quality Bowen or Booroomooka Angus bulls and are normally taken through to the high value EU Angus feeder market.
