			Slightly Stirry: 4 head	
	Cattle were good to handle in the yards and crush for unweaned stock. They would mostly walk into the crush calmly and stand quietly. Four head would not fully settle or exited the crush quickly. They settled quickly back in the yard and were calm and settled while moving from yard to yard. See videos.			
Handled With	Bikes , Horses , On foot , Vehicles			
Assessor Comments	A good to mostly very good quality line of yard weaned heifers. With medium to large frame they suit to background to heavy domestic feeder weights and then crop or grain finish for high quality slaughter markets. They are mostly good and very good quality, with the 14% fair quality just lacking a little frame and freshness. A small tail was removed from the line at assessment. They will be given their 5 in 1 booster during this weaning week and will be worked in and through the yards during weaning. Four heifers noted with slight blue eye scarring and while no active pink eye was visible they will be monitored during weaning. No heifers are being retained this years and the top 40% have the potential to be good quality future breeders. The heifers have not had access to grain and are GRASS market eligible. Please note vendor is offering 90 DAY Payment Terms to StockInsure approved or other approved purchasers - contact agent for details.
