	These Steers were a pleasure to assess all flowing very well through the race and crush with only the odd steer becoming agitated whilst in the crush. Very respectful of pressure and release. They have been run behind a single hot wire in a rotation system most of their lives.

	1 Head Twisted tail			
Assessor Comments	4 Decks - 128 Angus & Angus Cross Steers weighing from 290kg to 396kg to average 337.6kg at delivery. A great opportunity presents itself for buyers to purchase steers with plenty of frame and quality. These steers possess compensatory weight gain to be had on either grass or crop. This draft of black steers are also very consistent in frame score. The continuing dry season means these steers are being offloaded earlier than usual. Don't miss your chance to purchase quiet natured cattle that have had plenty of handling and will settle into their new environment very well.
