Quiet: 58 head Slightly Stirry: 2 head	Quiet: 55 head Slightly Stirry: 3 head Stirry: 2 head	Temperament not assessed in Paddock

Generally good to handle in and through the yards. Three heifers were moderately agitated in the crush and two were highly agitated. They would not fully settle and exited quickly. All settled quickly when back in the mob and were good to move and manage when taking photos and videos.

Assessor Comments	A fair through to good and mostly very good quality line of Angus feeder weight heifers. With medium to large frame they suit to take directly onto feed or to grow out to export feeder weights. The top 30% also have the potential to make good quality future Angus breeders. They were purchased through out 2025 for finishing into a grassfed slaughter program and their purchased date was recorded. Approx 6 head purchased in May 2025 and 54 head in Oct and Nov 2025. All mouthed at assessment with 2 x 2 tooths, another two head just about to break 2 teeth and the balance solid milk tooths. Note another 2 decks of similar heifers from this vendor located approx 25km away. These are good quality heifers that are still gaining weight and are primed to move ahead quickly on good feed.
