	Heifers handled well under a calm and safe environment. The odd heifer displayed discomfort in the lead-up and crush however yard setup can be to fault. They were quick to settle once in a group.

Assessor Comments	Buyers, on offer is a quality line of 41 MILWILLAH BLD Angus heifers, presenting as a lead draft with none retained. These heifers weighed 285kg+ at assessment and display all the traits sought after in quality breeding females, including excellent bone, thickness, length and depth. A very even and attractive line with plenty of performance and femininity, they offer buyers the flexibility to continue growing out into future breeders or to take through to heavier feeder or kill specifications. The heifers have been yard weaned for 7 days and educated onto hay feeders, adding to their suitability for backgrounding or feedlot programs. Heifers show strong potential to add value in a range of operations. Please note, the vendor also has 57 Angus steer calves offered in the same sale.
