Cattle definitely had some run in them, but exacerbated by very poor yards to process cattle. Typical temperament of cattle that have been on agistment, paddock moved periodically but otherwise little human contact.

Notable Traits		
		Traits
	22 Head	Cloudy eye (old scarring)

Assessor Comments	Angus feeder heifers that were bred in Tassie and sent to Bookaar on agistment. The east coast of Tassie has experienced very dry conditions for the last couple of years and these heifers would have been given two opportunities to join. Heifers have freshened up nicely and ready to be fed. This group don't have the performance upside of the tops. Cloudy eyes are not considered an inhibitor to performance. Cattle were in holding paddock over night prior to yarding.
